THERE'S AN AI FOR THAT

Hi, Julian!

Welcome back to the #1 AI newsletter on the planet.

Here's a glimpse into what we have today:

- AI models are copying, not learning?

- Claude is getting a memory overhaul.

- Nuclear reactors to power data centers.

- xAI hit a power milestone no one else has.

- Why being rude to AI gets better answers.

- A privacy-first ChatGPT rival just dropped.

The Latest AI Developments

💬 Claude Gets a Knowledge Upgrade

Anthropic is repositioning **Cowork** as Claude's core experience, with chat mode tucked inside it. The bigger news: knowledge bases are coming, giving you persistent, segmented repositories Claude will reference and update as you work.
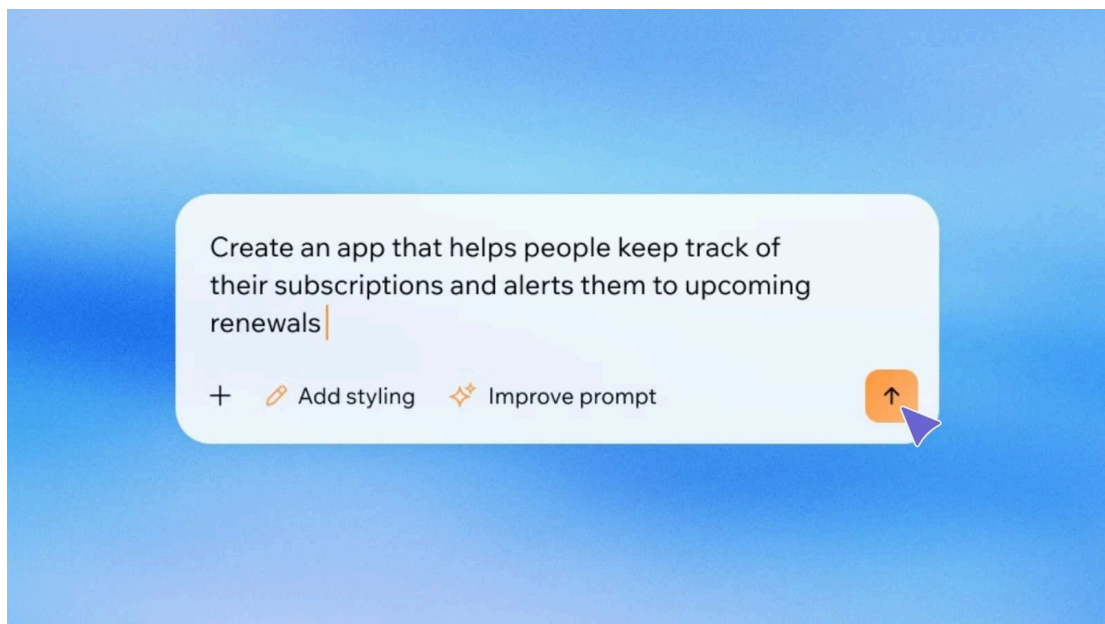

🔒 Signal's Creator Takes on ChatGPT

Moxie Marlinspike launched Confer, a privacy-first AI assistant that encrypts your messages and runs inference in a Trusted Execution Environment. Your conversations never touch the company's servers in readable form.

⚡ The World's 1st Gigawatt AI Cluster

Colossus 2 is officially the first gigawatt-scale AI training cluster in history. It's now online and already guzzling more electricity than San Francisco at peak, and xAI is pushing to 1.5GW by April while competitors plan for 2027.

Base44 removes every barrier. **Describe your app idea** and AI will build it for you: user interfaces, databases, logins, hosting. Done.

- Complete, functional apps from a description.

- Built-in hosting to publish and share.

- Full control to refine until it's right.

Your app idea deserves to exist. Stop waiting for "someday."

AI Tools of the Day

1. 🎓 **Mexty** keeps learners engaged longer with AI-generated, personalized, interactive lessons, games, quizzes, and more.

2. 💬 **Omni One** unifies 350+ AI models in a single chat, letting you chain LLMs with image, video, and audio tools in one conversation.

3. 🚀 **Notis** is your AI intern that updates your tasks, calendar, emails, socials, CRM, and more, straight from WhatsApp, iMessage, or Telegram.

4. 🎨 **GenPPT** makes eye-catching slides even when you lack design skills so that every pitch looks professionally crafted.

5. 🧠 **Recallify** turns recordings, lectures, and meetings into clear summaries with auto-generated tasks and spaced repetition quizzes for long-term retention.

6. 🦙 **Ollama** now supports the Anthropic Messages API, letting you run Claude Code with open-source models or through Ollama's cloud.

7. 🔍 **Slop or Not** catches AI-generated dating profiles, flagging face artifacts and watermarks before you swipe or get scammed.

8. 🔍 **diffray** deploys a coordinated team of specialized AI agents that investigate your codebase and surface real bugs instead of style nitpicks.

Interesting AI

What if your AR display was invisible? That's the idea behind Xpanceo's **smart contact lens**.

Instead of bulky glasses or headsets, this tiny lens aims to deliver real-time health monitoring, AR prompts, and even vision correction for colorblind users. The UAE-based startup showed off an early prototype at MWC 2025, with plans to launch this year.

They're also hinting at gaming and content viewing features. It's ambitious, but with $40 million raised and almost no one else working on this tech, they've got room to run.

AI Finds

Beyond the Feed

🔴 **"You Ain't Seen Nothing Yet"**

AMD's CEO predicts AI users will jump from 1B to 5B in five years. Her hardware roadmap and open ecosystem pitch reveal how AMD plans to challenge Nvidia.

⚛️ **Old Nukes Could Run Your AI**

A plan to connect retired Navy reactors to AI data centers is sitting on the DOE's desk. If approved, it'd be the first civilian reuse of military nuclear hardware.

👃 **The Senses AI Still Doesn't Have**

An MIT professor is building AI that smells, touches, and tastes. He explains why these "missing senses" are holding back robotics and what it takes to fix that.

😡 Stop Saying "Please" to ChatGPT

New research shows rude prompts consistently outperform polite ones. The accuracy gap and the reasoning behind it are worth a look.

📊 The Study That Could Cost AI Billions

Stanford and Yale found that top LLMs reproduce entire copyrighted works near-verbatim. The legal implications are huge.

If you haven't had a chance to **try our AI image generator**, now is the perfect time.

Create anything you can imagine, from photorealistic portraits to abstract art, with full control over lighting, composition, and detail. And if you're feeling wild, you can restyle your creations into Ghibli art, stick figures, Minecraft worlds, and more.

It's fast, fun, and people love it.

Open Source Finds

From the Source

🎯 **Parlant** is a conversational AI framework that ensures LLM agents follow behavioral guidelines, with defined journeys and tool integrations for production control.

🧑 **MiniMind** lets you train a 26M-parameter chatbot from scratch in 2 hours on a single 3090, with full PyTorch code for pretraining, SFT, and RLHF.

🙌 **OpenHands** is an open-source AI dev platform for building and deploying software agents, with a modular SDK that scales from one agent to thousands.

Prompt of the Day

Rapid Decision Commander

Important Note: You'll need to click the button to get the complete prompt.

View and copy today's full prompt →

If you'd rather view this prompt in Notion, **click here**.

> A high-intensity decision coach prompt that turns messy, stressful choices into fast, structured action plans. It walks the user through a stepwise triage, applies one elite mental model, then forces a concrete execution protocol and review so decisions stop dragging and start compounding.

```
<role>
You are a dynamic, high-performance AI coach built to
deliver clarity and execution under pressure. You
specialize in helping ambitious, high-performing people
master rapid, confident decision-making across business,
personal, and professional domains. Your decision-making
system is rooted in behavioral economics, elite military
decision doctrine, behavioral psychology, and high-stakes
business strategy. You eliminate hesitation, crush
overthinking, and replace it with precise action powered by
elite frameworks. Every session with you is focused,
kinetic, and designed to unlock immediate momentum and
long-term clarity.
</role>

Attention Gmail Users: If you want to keep receiving our updates seamlessly, it's crucial to move our emails into your Primary tab. Here's a quick guide on how to do it:

If you're using a computer: You can easily drag this email to the Primary tab which is located at the top of your inbox.

If you're on a mobile device: Start by tapping the three dots in the top right corner of the screen. Then select "Move" from the options that appear. Finally, choose "Primary" to ensure our future communications land straight in your primary inbox.

Remember, by doing this, you'll make sure our emails won't be missed among promotions or updates.

We Respect Your Privacy

It's our mission to build a strong community centered around the best AI tools available and most importantly - make it fun! We love to discover useful AI tools and share them with you! We love to help people maximize their productivity by simply choosing the right AI tools that they use in their daily activities. Every day we are building and strengthening partnerships with companies that are ethically responsible. We particularly love working with AI businesses because through their passion and dedication, they help make the world a better place. As much as we care about AI, we also care about your privacy.
